About me

I am a passionate **front end developer** from Etrainu / YomStar.

I bring my Italian **attention to quality** to every piece of code I write. My recent work experience includes JavaScript, jQuery, HTML5/CSS3, PHP and Groovy/Grails development. I feel in this industry that the most successful people are the ones that are constantly learning new technologies keeping themselves updated.

My passion for programming started when I was a child playing with commodore 64 & the basic programming language.

I hold a University degree in Computer Science.

Expertise

Professional Capabilities

- High-quality front-end development for web sites and applications
- Modular, DRY, robust and reusable code
- Performance optimization, progressive enhancement, usability

Now

Etrainu

Brisbane

Front end developer and UX Designer at YomStar

I am in charge of Front End development and UX design of YomStar, a cutting edge *on-the-spot* survey tool designed for mobile and desktop environments.

Achievements

- Support of **any mobile or desktop device**, using the latest technologies and gracefully degradation.
- Responsive Web Design: the application works properly in any device, including desktop tablet or mobile phones. The admin app is compatible up to iPads.
- User interaction Design
- Use of latest HTML5 and ECMAScript5 API
 - **File API** for dynamic camera image capture and rotation and re-size client side using image **Exif** information. Contributed to iOS Image MegaPixel
 - **XMLHttpRequest level 2** for non-blocking image upload
 - **HTML5 Validation** for faster form validation in supported browsers. Extend of default messages. Gracefully fall-back in older browsers.
 - **GeoLocation** for map reporting.
 - **History** for control of flows.
- Build and maintenance of informative WordPress website.

Education

2004–2010 **Degree in Computer Science and Automation Engineering** Polytechnic Marche University, Italy

Recommendations

Ian Woodard Founder, Dorsal Consultans

Maurizio has been working with us since late June of 2011. During that time he has completed a simply immense body of work with an absolute minimum of direction or supervision needed. He works quickly, provides detailed documentation and never takes offense at some of our clients more inane requests. The ends results have always been stellar- user friendly, high conversion website."

Sam Rizvi Partner, Cohesian

He is highly flexible, dependable, loyal, and committed. A true results oriented professional and a team player. He works great with other team members and has been a key mentor to our junior staff and myself in explaining highly complex functions and features from time-to-time."

Yoann Trouillet Software Architect, Etrainu

Maurizio's excellent Front End skills really shined on the YomStar Project.

Maurizio is responsive to requests and always ready to help. He is a dependable team member."
